

CLAIMS

1. Sterilisation chamber for use in a sterilisation device or the like, said chamber being adapted to enclose
5 goods to be sterilised during a sterilisation process,
c h a r a c t e r i s e d in that said chamber has a self
supported structure being essentially manufactured from a
polymeric material.
2. Sterilisation chamber according to claim 1,
10 wherein said chamber is manufactured from an injection-
mouldable material.
3. Sterilisation chamber according to claim 2,
wherein a reinforcement material, such as a glass mate-
rial is included in said injection-mouldable material.
- 15 4. Sterilisation chamber according to claim 2 or 3,
wherein a reinforcement material, such as a rowing weave
material is arranged around said injection moulded mate-
rial, forming an outer layer of said chamber.
5. Sterilisation chamber according to claim 2, 3 or
20 4 wherein said injection-mouldable material essentially
is a polyamide material.
6. Sterilisation chamber according to claim 1,
wherein said chamber is manufactured from a composite ma-
terial.
- 25 7. Sterilisation chamber according to claim 6,
wherein said composite material comprises a carbon fibre
rowing weave and a concatenating polymer material.
8. Sterilisation chamber according to claim 7,
wherein said concatenating polymer material is an epoxy
30 material.
9. Sterilisation chamber according to claim 6,
wherein said composite material comprises a glass fibre
rowing weave and a concatenating polymer material.
10. Sterilisation chamber according to claim 9,
35 wherein said concatenating polymer material is one of a
polyvinyl, isopolyester or orthopolyester material.

00879117-061301

11. Sterilisation chamber according to any one of the preceding claims, wherein said chamber is releasably mountable in said sterilisation device.

12. Sterilisation chamber according to any one of the preceding claims, wherein said chamber is essentially manufactured in one continuous piece.

13. Sterilisation chamber according to claim 12, wherein components, such as inlets and outlets for steam, moist and the like, are integrally formed with said chamber.

14. Sterilisation chamber according to claim 12 or 13, wherein said chamber is provided with a pair of integrally formed tracks, in which a sealing chamber door may be slidably mounted.

15. Sterilisation device, being provided with a sterilisation chamber, in which a sterilisation process is intended to be performed, characterised in that said chamber is as described in any one of the claims 1-14.
